### Overview

**Software Center** is a self-service interface to install applications, software updates, and other software used in IIT (Italian Institute of Technology).

Oversimplifying, we could say that Software Center cloud resembles Google Play and Microsoft Store app; as it filters the list of applications that are compatible with the device in use and makes them available to download for the end user.

Software Center is installed automatically on IIT Windows devices managed by ICT organization

*To get started, see "How to open Software Center".*

### How to open Software Center.

For the simplest method to start Software Center, go to **Start** and type **Software Center**

You may not need to type the entire string for Windows to find the best match.

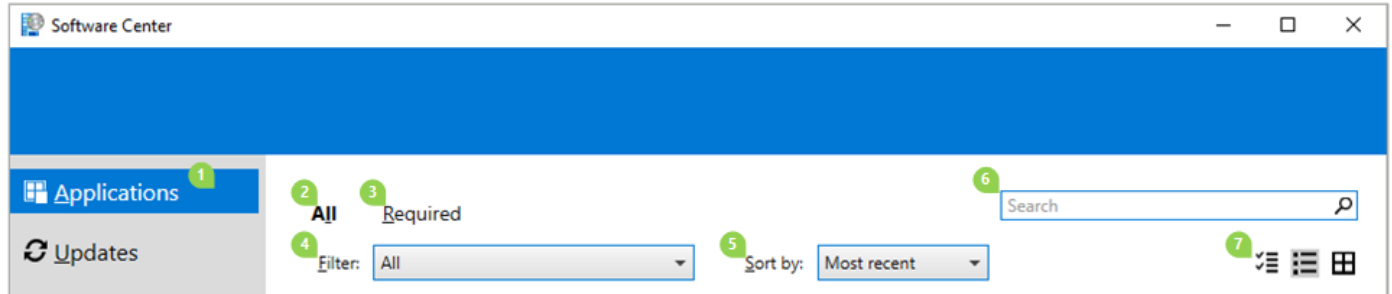

To navigate the Start menu, look under the **Microsoft Endpoint Manager** group for the **Software Center** icon.

If you can't find Software Center in the Start menu, please contact your IT administrator.

## Applications

Select the **Applications** tab (1) to find and install applications that your IT admin deploys to you or this computer

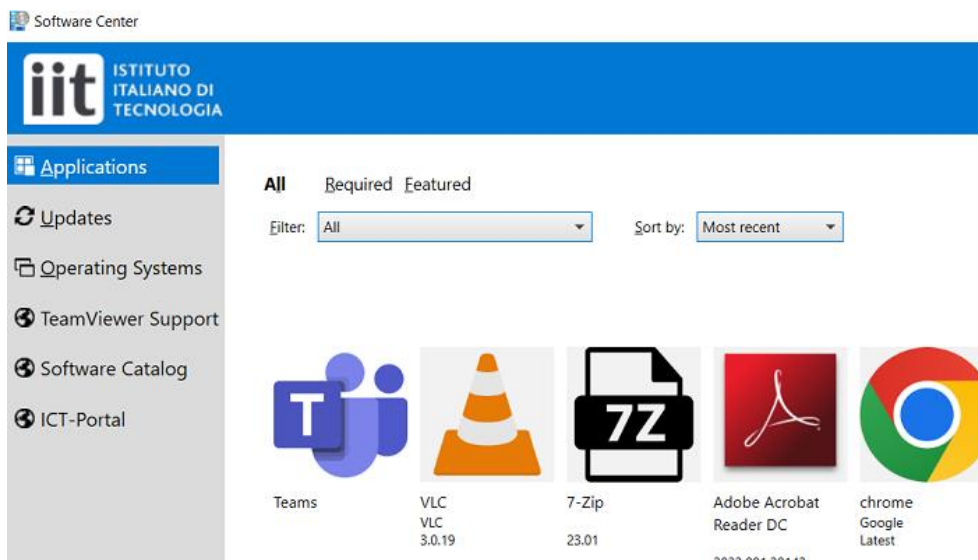

- **All** (2): Shows all available applications that you can install.
- **Required** (3): Your IT admin enforces these applications. If you uninstall one of these applications, Software Center reinstalls it.
- **Filters** (4): Your IT admin may create categories of applications. If available, select the drop-down list to filter the view to only those applications in a specific category. Select **All** to show all applications.
- **Sort by** (5): Rearrange the list of applications. By default, this list is sorted by **Most recent**. Recently available applications display with a **New** banner that's visible for seven days.
- **Search** (6): Still can't find what you're looking for? Enter keywords in the Search box to find it!
- **Switch the view** (7): Select the icons to switch the view between list view and tile view. By default, the applications list shows as graphic tiles.

## Install an application

Select an application from the list to see more information about it.

From app menu select: **INSTALL** to install it. If an app is already installed you will see also **UNINSTALL** and **REPAIR**.

Results may vary depending on software, some applications could need previous approval to be available.

## Software catalogue details:

Software catalogue is divided between **ICT software catalogue** (fully supported by ICT department); and open-source programs (**Other**).

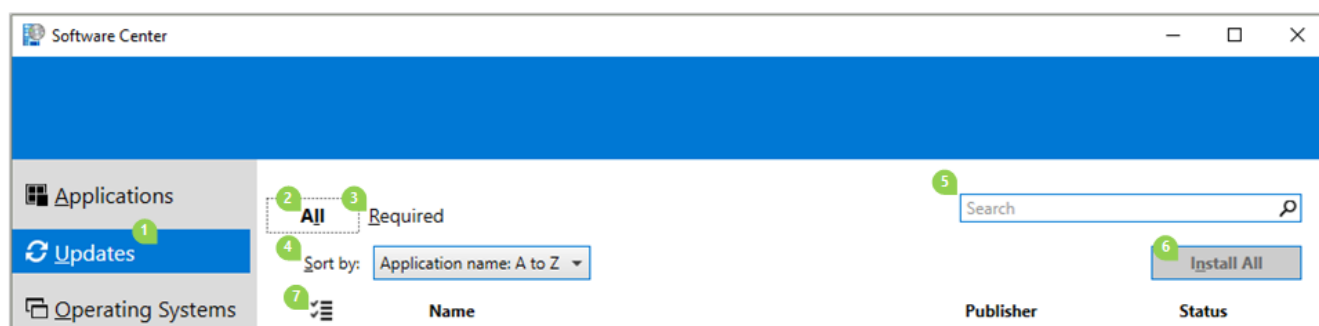

**All** Required Featured

Filter:

Sort by:

## Updates:

Selezionare la scheda **Aggiornamenti** (1) per visualizzare e installare gli aggiornamenti software distribuiti dall'amministratore IT nel computer.

- Select the **Updates** tab (1) to view and install software updates that your IT admin deploys to this computer.
- **All** (2): Shows all updates that you can install
- **Required** (3): Your IT admin enforces these updates.
- **Sort by** (4): Rearrange the list of updates. By default, this list is sorted by **Application name: A to Z**.
- **Search** (5): Still cannot find what you are looking for? Enter keywords in the Search box to find it!
- To install updates, select **Install All** (6).
- To only install specific updates, select the icon to enter multi-select mode (7):  Check the updates to install, and then select **Install Selected**.
